

Franklin Fueling Systems

Fueling Innovative Solutions

Date: May 9, 2007

Bulletin No.: B0507-02

To: Healy Distributors

From: Leon Schuster

Subject: Dispensing Systems Rebuilt Equipment

This bulletin is provided in an effort to educate and protect Healy distributors, marketers, and service contractors regarding the use of rebuilt equipment, specifically vapor recovery nozzles and vacuum pumps. Please carefully review the following information.

At this time, Franklin Fueling Systems (FFS) is the only authorized manufacturer and rebuilder of Healy Vapor Recovery equipment. Also, vapor recovery nozzles and vacuum pumps manufactured or rebuilt by Franklin Fueling Systems are the ONLY products listed and approved for use in sites that follow California Air Resources Board (CARB) Phase II Vapor Recovery Executive Orders. The use of equipment not listed in Executive Orders or approved by the California Air Resources Board (CARB) will result in a Notice of Violation (NOV) and penalties for use of non-CARB approved equipment.

As a reminder, Franklin Fueling Systems offers a recycling program to our distributors for Healy nozzles and VP1000 vacuum pumps. The recycling program offers core value for your usable returned nozzles and VP1000s, as well as offering the recycled cores as rebuilt product at a reduced price. Rebuilt product from FFS is sold with the same warranty coverage as new product. For further details of the recycling program, please contact Franklin Fueling Systems or review Dispensing Systems Price List Supplement p/n FFS-0067.

For questions regarding the information outlined above, or any Dispensing Systems equipment questions, please contact Franklin Fueling Systems.

Thank you,

Leon Schuster
